Uniden®

OWNER'S **MANUAL**

Contents

Welcome

Thank you for purchasing a Uniden Multi-Handset phone. The USB connection lets you use your personal computer to edit your phonebook, download schedule reminders, and even import contacts from Microsoft® Outlook®.

Note: Illustrations in this manual are used for explanation purposes. Some illustrations in this manual may differ from the actual unit.

As an Energy Star® Partner, Uniden has determined that this product or product models meets the Energy Star® guidelines for energy efficiency.

Energy Star® is a U.S. registered mark.

Features

- 5.8GHz Digital Expandable System
- Integrated Answering system
- Caller ID/Call Waiting Deluxe Options
- Customize Handset Profiles Using Personal Computer
- 100 Phonebook Names (4 Numbers Per Name)
- Downloadable Images
- Recordable Ringer Tones
- Calendar with Schedule Reminder Capability
- Battery Backup During Power Failure (optional)

Uniden® is a registered trademark of Uniden America Corporation. AutoStandby, DirectLink, IntegriSound and Random Code are trademarks of Uniden America.

Microsoft and Windows are either registered trademarks or trademarks of Microsoft Corporation in the United States and/or other countries.

Terminology

- **Standby mode:** The handset is not in use. If it is off the cradle, no line has been activated. No dial tone is present.
- **Talk mode:** A telephone line has been activated on the handset, enabling a dial tone.

Accessibility

Uniden provides a customer service hotline for accessibility questions. If you have a disability and need customer service assistance or if you have any questions about how Uniden's products can accommodate persons with disabilities, please call the accessibility voice/TTY line:
1-800-874-9314

A representative is available to talk to you M-F, 8:00 am to 5:00 pm, CST. After hours, you can leave us a message, and we will call you back. Information is also available on our website, www.uniden.com, under the "Accessibility" link.

For maximum range:

• Do not hold the handset where you might block the signal.

Antenna

Correct

Incorrect

• Metal and reinforced concrete may affect cordless telephone performance.

Setting up the Phone

Choose the best location

When choosing a location for your new phone, here are some important guidelines you should consider:

Avoid heat sources, such as radiators, air ducts, and sunlight

Avoid noise sources such as a window by a street with heavy traffic

Avoid television sets and other electronic equipment

Avoid microwave ovens

Avoid excessive moisture, extremely low temperatures, dust, mechanical vibration, or shock

Choose a central location

Avoid personal computers

Avoid other cordless telephones
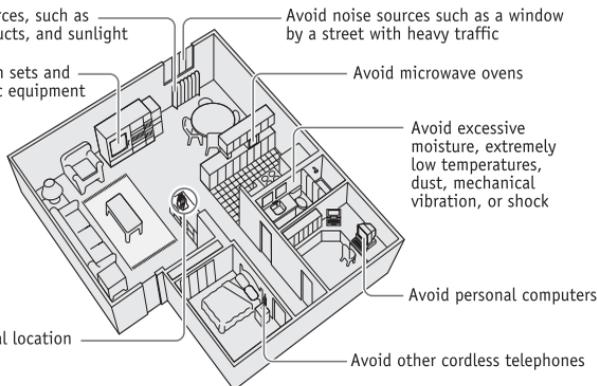

• The location should be close to both a phone jack and a continuous power outlet (one which is not connected to a switch).
• The base and handset should be kept away from sources of electrical noise such as motors, Microwave ovens, and fluorescent lighting.
• For better reception, place the base as high as possible.
• The base should be placed in an open area for optimum range and reception.
• If your home has specially wired alarm equipment connected to your phone line, be sure that installing the system does not disable your alarm equipment.
• If you have questions about what will disable alarm equipment, contact your telephone company or a qualified installer.

Install the rechargeable battery pack

1) Press down on the handset battery case cover (use the finger indention for a better grip) and slide the cover downward to remove.

2) Place the battery pack in the battery compartment with the connectors on the battery and on compartment aligned.

3) Place the battery case cover back on the handset and slide it upwards until it clicks into place.

note
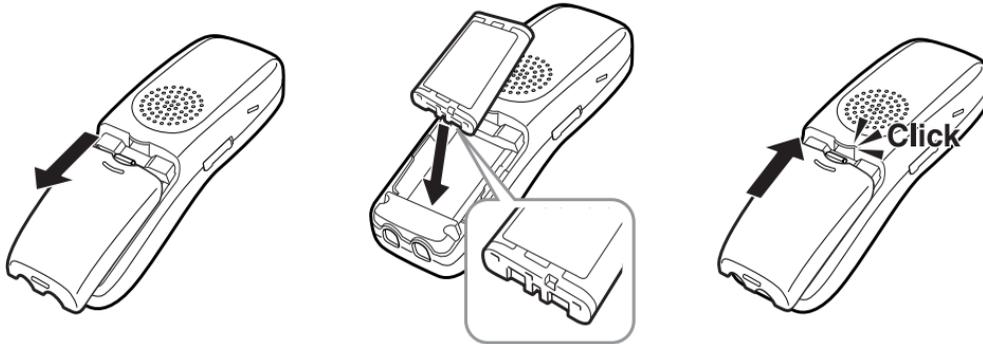

Use only the Uniden (BT-0003) rechargeable battery pack supplied with your cordless telephone.

note

- Even when the battery pack is not being used, it will gradually discharge over a long period of time.

- For optimum performance, be sure to return the handset to the cradle after each telephone call.

- If the handset is left off the base, the actual talk mode duration will be reduced respective to the amount of time the handset is off the cradle.

Low battery alert

When the battery pack is very low, the phone is programmed to eliminate functions in order to save power.

The battery pack needs to be charged when:
- The empty battery icon appears.
- Low Battery appears in the display.

If the phone is in standby mode, none of the keys will operate. If you are on a call, complete your conversation as quickly as possible, and return the handset to the cradle.
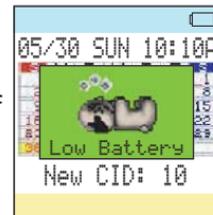

Cleaning the battery charging contacts

To maintain a good charge, clean the charging contacts on the handset once a month. Dampen a cloth with plain water. Gently rub the damp cloth over the charging contacts until all visible dirt is removed. Dry the contacts thoroughly before returning the handset to the cradle.

Caution: Do not use paint thinner, benzene, alcohol, or other chemical products. Doing so may discolor the surface of the telephone and damage the finish.

Contacts

Connect the base and charge the handset

1) Connect the AC adapter to the **DC IN 9V** jack.

   Place the base close to the AC outlet to avoid long extension cords.

2) Connect the AC adapter to a continuous power supply (i.e., an outlet that is not controlled by a switch).

3) Place the handset in the base with the display facing forward.

4) Make sure that the **charge** LED illuminates.
   If the LED does not illuminate, check to see that the AC adapter is plugged in and the handset makes good contact with the base charging contacts.

5) **Charge your handset at least 15 hours before plugging into the phone line.**

6) Once the handset battery pack is fully charged, connect the telephone line cord to the **TEL LINE** jack and to a telephone outlet.

Route the cord.

To AC outlet

To DC IN 9V

AC adapter (supplied)

To telephone outlet

Telephone line cord (supplied)

To TEL LINE
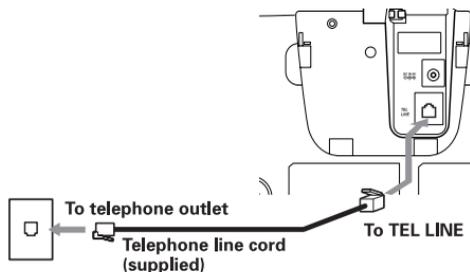

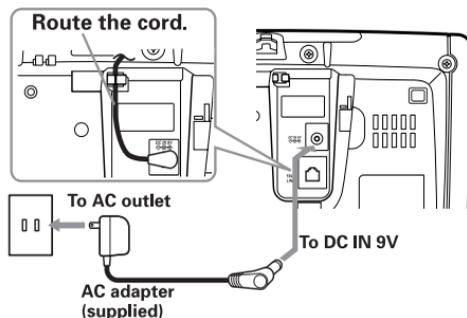

note

- •**Use only the supplied AD-0006 AC adapter. Do not use any other AC adapter.**
- •Do not place the power cord where it creates a trip hazard or where it could become chafed and create a fire or electrical hazard.
- •Don't place the base in direct sunlight or subject it to high temperatures. The battery may not charge properly.

tip

If your telephone outlet isn't modular, contact your telephone company.

DO NOT use an AC outlet controlled by a wall switch.

Mounting the Base Unit on a Wall

Standard wall plate mounting

This phone can be mounted on any standard wall plate.

1) Plug the AC adapter into the DC IN 9V jack.

2) Plug the telephone line cord into the TEL LINE jack. Wrap the cord inside the molded wiring channel as shown.

3) Snap the wall mount adapter into the notches on the base top.

4) Wrap the AC adapter cord and telephone line cord inside the molded wiring channel as shown.

5) Plug the AC adapter into a standard 120V AC wall outlet.

6) Plug the telephone line cord into the telephone outlet.

7) Align the mounting slots on the base with the mounting posts on the wall. Then push in and down until the phone is firmly seated.

Wall plate

AC outlet   **AC adapter**
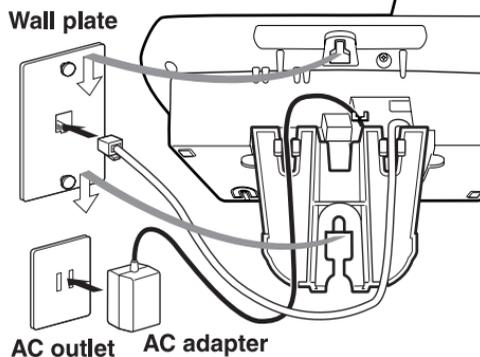

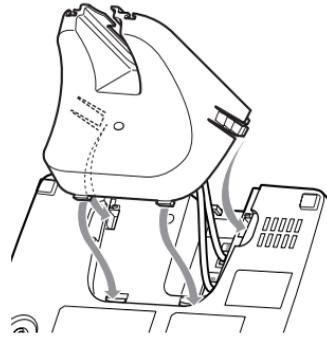

Expanding Your Phone

Your phone can support a total of ten handsets. Expansion handsets do not need to be connected to a phone jack, and allow you to use additional features such as DirectLink Mode and up to 4-way conference calling. Expansion handsets need to be registered to the base before they will operate.

10 Handsets

note

- Advanced features may not be supported by older handsets.
- If you have any trouble with your phone, visit our web site at www.uniden.com or call our Customer Hotline (see back cover page).

Backwards/Forwards Compatibility

Your phone is compatible with other Uniden 5.8GHz Digital Expandable Handsets. Compatible models include the **TCX400**, **TCX440**, **ELX500**, **TCX805**, and **TCX860**. (Please check www.uniden.com for an updated list of expansion handsets compatible with this series.)

BACKWARD FORWARD
COMPATIBLE

Connect the expansion handset's charger

The handset is powered by a rechargeable battery pack. The battery recharges automatically when the handset is placed in the charger.

Route the cord.

To AC outlet

To DC IN 9V

AC adapter (supplied)

1) Connect the AC adapter to the DC IN 9V jack and to a standard 120V AC wall outlet.
2) Set the charger on a desk or tabletop, and place the handset in the charger with the handset facing forward.
3) Make sure that the **charge** LED illuminates. If the LED does not illuminate, check to see that the AC adapter is plugged in and the handset makes good contact with the charger charging contacts.
4) Charge the handset battery pack for at least 15 hours before using your new cordless telephone for the first time.
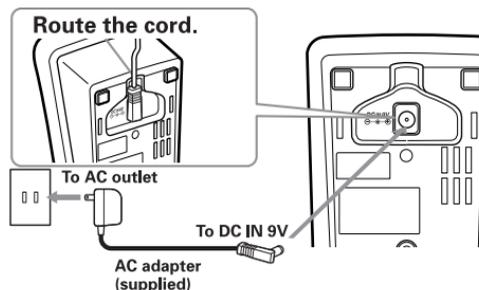

Register the Handset

Handsets supplied with the phone are registered to the base by the factory. Pre-registered handsets display a handset ID number. Handsets that have not been registered display MUST place the handset in base to register! Models may vary, refer to Owners Manual for help. in the LCD. When you register an extra handset to the base, the handset ID will be assigned. Only one handset can be registered at a time.

Register the TCX440 and TCX400 expansion handset to main base

Before an expansion handset is registered, the battery pack MUST be charged for **15 hours**.

To register a TCX440 or TCX400 handset, simply place it in the main base.

While the handset is registering, Handset Registering will appear in the LCD. When Registration complete. is displayed, the handset has been registered to the base. If Registration failed. appears, please try these steps again.

To register a TCX805, TCX860, ELX500 handset, follow the steps below:

1) From the base, press *menu/select* and select System Setup menu.

2) Select Register Handset, and press *menu/select.*

3) On the handset, press and hold # until you hear a beep.

```
              <System Setup>
MESSAGE Global
       ┌─┐ Register Handset
       │ │
       │ │         SELECT
       └─┘
```

While the handset is registering, Handset Registering will appear in the LCD. When Registration complete. is displayed, the handset has been registered to the base. If Registration failed. appears, please try these steps again.

Changing the Digital Security Code

The digital security code is an identification code used to connect the handset and the base unit. Normally, setting the code is not necessary. In the rare situation that you suspect another cordless telephone is using the same security code, you can change the code. To change the digital security code:

1. De-register all the handsets you have (see page 80).
2. Re-register each handset by following the steps on page 13.

Installing the Beltclip

To attach the beltclip
Insert the beltclip into the holes on each side of the handset. Press down until it clicks.
To remove the beltclip
Pull either side of the beltclip to release the tabs from the holes.
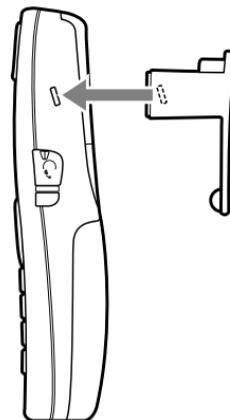

Optional Headset Installation

Your phone may be used with an optional headset. To use an optional headset, insert the headset plug into the headset jack. Your phone is ready for hands-free conversations. (Headsets may be purchased by calling Uniden's Parts Department (see back cover page).
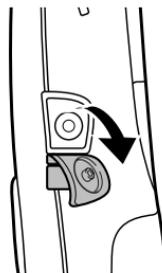

Installing Uniden's Cordless Telephone Customization Tool

This phone includes Uniden's Cordless Telephone Customization Tool for your Windows PC. You can use this software application to completely configure your phone, download pictures for wallpaper, and import contacts from Microsoft$^{®}$ Outlook$^{®}$.

NOTE: Uniden's Cordless Telephone Customization Tool requires either Microsoft®, Windows® 98SE, Windows ME, Windows 2000, Windows XP and more than 150MB free hard drive space.

1) Insert the Cordless Telephone Customization Tool CD into your computer's CD-ROM drive. The installation application should start automatically.
2) If the application doesn't start, go to the *Start* menu and select *Run*.
3) In the window, type *d:\autorun.exe* (where *d* is the letter assigned to your CD-ROM drive), and click **OK**.
4) Once the software is installed, connect the USB cable to the handset and your PC as shown.
5) Customize your Uniden cordless handset with your personal preferences.

To PC

To the USB jack
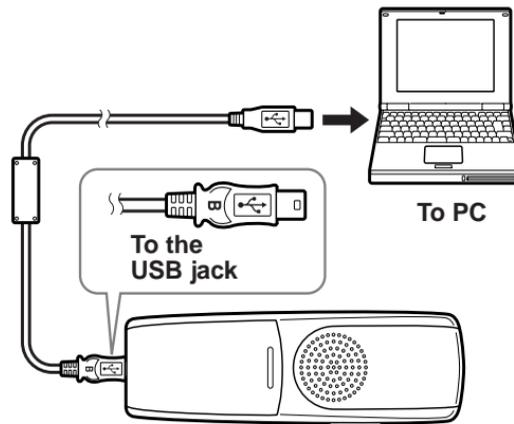

For complete instructions on using Uniden's Cordless Telephone Customization Tool, see the help file on the CD-ROM.

Using the Interface

Example of the standby mode display
• Handset

Battery icon

Date, Day of the week, and time

Number of new caller ID calls received

• Base

MESSAGE SUN 12:00A — Day of the week and time

New CID: 100 — Number of new caller ID calls received

Number of message

Status if your answering machine
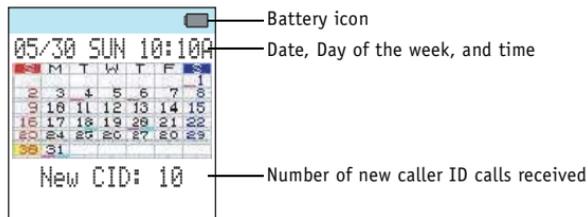

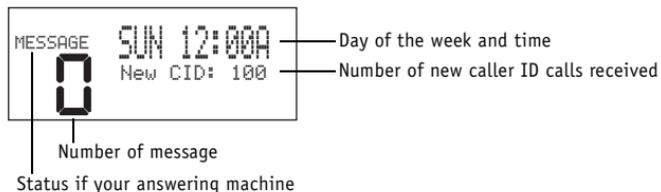

(note) If you do not press a key within 30 seconds, the phone will time out and exit the menu mode. When setting Date and Time, the time-out period is extended to two minutes.

NEW — appears if you have a new message.

FULL — appears when the message storage is full.

Announce ONLY — appears if you set your answering system to announce only.

Display Icons

ICON		DESCRIPTION
Handset	**Base**	
☐☐☐☐	-	**Battery** icons indicate the handset battery status. This icon cycles depending on the battery status (empty, low, medium, and full).
🔔	**RING OFF**	**Ringer off** icon indicates that the ringer is turned off.
☎	☎	**Telephone** icon indicates that the line is in use.
🔇	**M**	**Mute** icon appears when you mute the handset.
🔊	-	**Speaker** icon appears when the handset speaker phone is in use.
✉	-	**Envelope** icon appears when a new message is received.
P	**P**	**Privacy** icon appears when the Privacy Mode is turned on.
📼	📼	**Call record** icon appears while recording a conversation.

Soft Key Function

"Soft" keys are keys that change function during the operation of the phone. There are two soft keys on the handset and base.

The text right above the soft key indicates that key's current function. For example, when the phone is in standby mode, pressing soft key 2 on the handset makes a selection. When the phone is in talk mode, pressing soft key 2 brings up the options menu. Complete information on the features controlled by the soft keys can be found under each feature.

In standby mode

Handset

Soft key 2

Base

In talk mode

Soft key 2
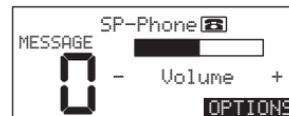

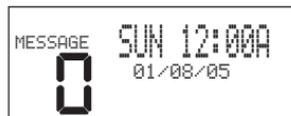

Soft key 2

Using the joystick

The joystick makes it easy to use your phone. The four most commonly used functions are accessible just by moving the joystick.
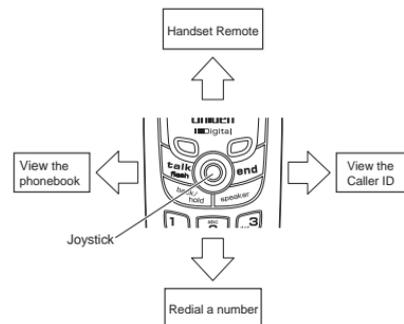

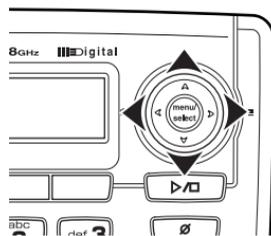

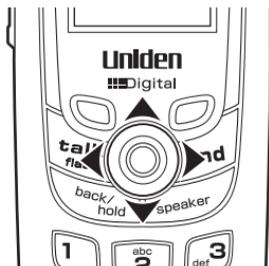

Highlight the option you want by moving the joystick up, down, right, or left on the handset, or up or down on the base. This will move the cursor; the option currently highlighted appears in reversed out text.

Select the highlighted option by pressing in on the center of the joystick or the *menu/select* key on the base.

To exit the **MENU** and return to standby, press the *end* key on the handset or the *end/find handset* key on the base.

To go back a level in the menu, press the *back/hold/intercom.*

Entering text

You can use the number keypad on your phone to enter text by referring to the letters printed on each number key. When you press the number key in a text entry field, the phone displays the first letter printed on the number key. Press the number key twice to display the second letter and three times to display the third. Capital letters are displayed first, then lower case letters, then the number on the key.

If two letters in a row use the same number key, enter the first letter, then press the joystick to the right to move the cursor to the next position to enter the second letter.
For example, to enter Movies:

keys	Number of times key is pressed								
	1	**2**	**3**	**4**	**5**	**6**	**7**	**8**	**9**
_1_	1								
2 abc	A	B	C	a	b	c	2		
3 def	D	E	F	d	e	f	3		
4 ghi	G	H	I	g	h	i	4		
5 jkl	J	K	L	j	k	l	5		
6 mno	M	N	O	m	n	o	6		
7 pqrs	P	Q	R	S	p	q	r	s	7
8 tuv	T	U	V	t	u	v	8		
9 wxyz	W	X	Y	Z	w	x	y	z	9
	&	(	)	<	>	/	(blank)	--	--
0 oper	.	;	:	?	!	@	'	"	*
	#	0							

1) Press 6 once to enter M.
2) Use joystick, or the right key to move the cursor to the right.
3) Press 6 six times to enter o.
4) Press 8 six times to enter v.
5) Press 4 six times to enter i.
6) Press 3 five times to enter e.
7) Press 7 eight times to enter s.
8) Press the center of the joystick or *menu/select* on the base to end your text entry.

If you make a mistake while entering a name, use the joystick to move the cursor to the incorrect character. Press the **DELETE** soft key to erase the incorrect character, and then enter the correct character.
To delete all characters in the text entry field, press and hold the **DELETE** soft key.

Main Menu Options

On the handset, the options are DirectLink, Room Monitor, Messages, Ringer Options, Speaker Setup, Display Options, Reminder, and System Setup.

Note:
All of these options can be configured in the Cordless Customization Application.

Handset Main Menu Options

System Setup

On the base, the options are Rings/Volumes, Caller ID, Redial, Phonebook, Room Monitor, Record Memo, and System Setup.

System Setup Menu

System Setup
Handset or Base

The following submenu options must be set separately for each handset and the base.

LCD Contrast (For Base)

You can change the contrast of your base display to make it easier to read. Your phone gives you 10 levels of contrast to choose from. To adjust the contrast, go to LCD Contrast. Use the up or right key to increase the contrast and the down or left key to decrease the contrast. When you like the level of contrast, press *menu/select* to select it.

Key Touch Tone

Key Touch Tone is the tone your keypad makes when keys are pressed. To turn off the tone, go to Key Touch Tone and select Off. A confirmation tone tells you that the tone has been deactivated.
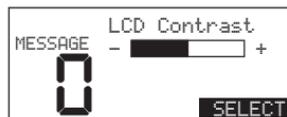

(System Setup)

- Handset (Base)
  - Call Privacy
  - Language
  - Auto Talk

Call Privacy

If you don't want other registered handsets or the base to interrupt you on a call, you can turn on privacy mode. As long as your handset or the base is in privacy mode, other handsets won't be able to join your call or make any calls of their own. To turn on privacy mode, go to Call Privacy and select On. You can turn on privacy mode when the phone is in standby or when you're already on a call.

Language (For Base)

You can change the language the menu display will use. Choose from English, French, or Spanish. To change the language, go to Language and select English, Français (French), or Español (Spanish). You hear a confirmation tone, and the display will use the selected language.

Auto Talk (Handset only)

Auto Talk lets you answer the phone by removing the handset from the cradle. To turn on Auto Talk go to Auto Talk and select On. A confirmation tone tells you that Auto Talk is active.

Any Key Answer (Handset only)

Any Key Answer lets you answer the phone by pressing any key on the number pad. To turn on Any Key Answer, go to Any Key Answer and select On. A confirmation tone tells you that Any Key Answer is active.

```
 Any Key Answer
On
Off

                 SELECT
```

(System Setup)

Any Key Answer

Banner (Handset only)

You can change the name your phone displays on the screen. If you have more than one handset, you can use the banner name to identify your handset during handset-to-handset functions like intercom and DirectLink. Go to Banner Display and enter the name you want to use. You can use up to 10 characters. Use the **DELETE** soft key to delete an existing handset name. Press the center of the joystick when you're finished.

```
 Banner Display
Mom's Phon #1

 DELETE
```

Banner Display

Unique ID (Handset only)

You can assign special ringer tones to anyone in your phonebook. When your phone gets a call, it looks up the Caller ID information in your phonebook; if you assigned a distinctive ringer and pictures to that number, the phone uses it so you know who's calling. To turn on distinctive ringing, go to Unique ID and select On. A confirmation tone tells you that distinctive ringing is active.

```
   Unique ID
On
Off

                 SELECT
```

Unique ID

If you don't activate Unique ID, the phone uses the default picture.

(System Setup)

Global

Date & Time

Global Setup

Global settings apply to all registered handsets and the base. If you change something under the global menu, you change it for handsets and the base. Only one handset or the base can change global settings at a time, and you have to make sure the phone is not currently being used.

(note) Some features may not be supported by older handsets.

Date and Time
To change the date and time shown in the display, go to Date & Time. Move the cursor up, down, right, or left to highlight the part you want to change (date, time, AM/PM). Use the number keypad, the up or down key, or */tone* to change each part. Press the center of joystick or *menu/select* on the base when you finish.
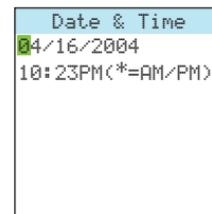

Call Waiting

Your phone supports Caller ID with Call Waiting, so you can see the name and number of someone who calls when you are already on the line. Your phone also supports Call Waiting Deluxe, which gives you a choice of how you want to handle a waiting call. You need to subscribe to these features with your phone company before you can use them.

To let your phone support these features, go to `Call Waiting`. Select `On`, and the phone will display the CallWaitDeluxe screen. Select `On`. (You have to turn on Call Waiting before you can turn on Call Waiting Deluxe.) A confirmation tone tells you that your phone is ready to use these features.

Global

Dial Mode

Dial Mode

Your phone can communicate with the telephone network in two different ways: tone dialing and pulse dialing. These days, most phone networks use a method called tone dialing, so your phone comes programmed for tone dialing.

If your phone company uses Pulse dialing, you will need to change your phone's dial mode. There's an easy way to tell: try making a call. If your call connects, your phone's setting is fine. If not, go to Dial Mode and select Pulse. A confirmation tone tells you that the dial mode has been changed and you can try making a call again.

```
     Dial Mode

Setting the Ringer Options

This menu lets you customize ringer or speaker volume settings on your phone. You can set these options separately for the base and each handset.

(Ringer Options)
(Base:Rings/Volumes)

Ringer Tones

Ringer Tone

You can set a different ringer for each handset and the base. This phone comes with 10 prerecorded songs and 15 different ringer tones; for the handset you can also record your own ringer tones (see page 30).

- Songs: Beethoven's Symphony #9 [Beethoven9], For Elise [Elise], Home Sweet Home [Hm Swt Hm], Lorri Song #6 [Lorri Song], WT Overture (Handset only), Twinkle Star (Handset only), Je Te Veux (Handset only) When the Irish Eyes Are Smiling [Irish Eyes] (Base only), Aura Lee (Base only), Let Me Call You Sweet Heart [Sweetheart] (Base only), Star Spangled Banner [Star Spangl], Old MacDonald [Old MacDld], We Wish You A Merry Christmas [Merry-Xmas]
- Ringer tones: Flicker, Clatter, Coin Toss, Synthesize, Finish Line, Soft Alert, Wake Up, Lighting Bug, Bebop, Tone Board, Chirp, Party Clap, Reminder, Burble, TeleTone,

1) Go to Ringer Tones and highlight the ringer you want. (Each ringer will sound as you highlight it.)
2) Select a ringer from the list.
3) Press the center of the joystick or *menu/select* on the base to confirm the setting. You will hear a confirmation tone, and the phone will go back to the menu.

(Ringer Options)
(Base:Rings/Volumes)

Unique Ring

Rec/Edit Rings

Unique Ring Setup (Base Only)

You can assign special ringer tones to anyone in your phonebook. When your phone gets a call, it looks up the Caller ID information in your phonebook; if you have assigned a distinctive ringer to that number, the phone uses that ring so you know who's calling.

```
                    Unique Ring
MESSAGE  On
   0     Off
                          SELECT
```
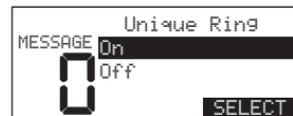

To turn on distinctive ringing, go to Unique Ring and select On. A confirmation tone tells you that Unique Ring is active.

Customize Your Own Distinctive Ringer Tones (Handset Only)

Your phone can store up to 5 different recordings (a total of 100 seconds) to use as ringer tones. Each recording must be less than 20 seconds long.

To the headset jack
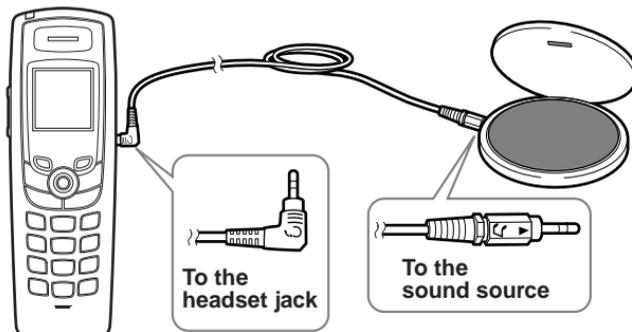

To the sound source

Storing Ringer Tones

1) Connect the audio recording cable to the handset and sound source (e.g.stereo or CD player). Insert one end of the audio recording cable into the handset's headset jack and the other end into the sound source. You can also simply use the handset's microphone by holding the handset close to the sound source.
2) Go to Rec/Edit Rings.
3) Select a location from 1-5, and press the **OPTIONS** soft key.
4) Select Record. To start recording, press the **RECORD** soft key. The message counter displays 20 and then begins to count down.
5) When you are finished recording, press the **STOP** soft key. The phone will play the recorded ringer. To re-record the ringer, press the **ReRec** soft key while playing the ringer.
6) Enter the title of this ringer (up to 12 digits) using the number keypad, or the **DELETE** soft key, right, or left key.
7) Press the center of the joystick. You will hear a confirmation tone, and Done! appears.

Playing the Ringer

1) Go to Rec/Edit Rings.
2) Select a ringer to play, and press the **OPTIONS** soft key.
3) Use the joystick to select Play. To stop, press the center of the joystick or the **STOP** soft key.

Changing Ringer Name
1) Go to Rec/Edit Rings.
2) Select the ringer title you want to change, and press the **OPTIONS** soft key.
3) Use joystick or the up/down key to select Change Title.
4) Edit the title of this ringer (up to 12 characters) using the number keypad, the **DELETE** soft key, and the right/left keys. When you are finished, press the center of the joystick. You will hear a confirmation tone, and Done! appears.

```
Enter Title
Obla-di
```
DELETE

Delete Ringer
To delete a ringer tone, go to Rec/Edit Rings, and select the ringer you want to delete. Press **OPTIONS** soft key. Use the joystick or the up/down key to select Delete. Select Yes. You will hear a confirmation tone, and Deleted! appears. The ringer is deleted from the list, and the phone stays on the ringer list.

```
<Options>
Play
Change Title
Delete

            SELECT
```

note
You can not delete the ringer if it is currently being used for the default ringer tone, for a Unique Ring setting, or for a Reminder.

Display Settings (Handset Only)

The following submenu options must be set separately for each handset.

(DisplayOptions)

Wall Paper

Wall Paper (Handset Only)

Your phone has 34 preset wallpaper/images to choose from. You can customize or replace 30 of these images using the software application CD-ROM supplied with this phone.

```

Making Calls

From the Handset

1) Remove the handset from the charging cradle.
2) Press *talk/flash*.
3) Listen for the dial tone.
4) Dial the number.

OR

1) Remove the handset from the charging cradle.
2) Dial the number.

If you need the phone to pause before dialing more digits (for example, to enter an access code or extension), press the center of the joystick, and select Pause Entry from the list. P appears in the display, which represents a 2-second pause.
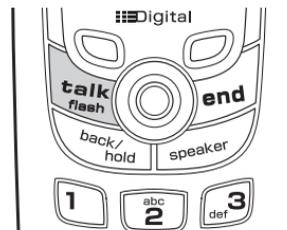

4) Press *talk/flash*.

From the Handset Speakerphone

1) Remove the handset from the charging cradle.
2) Press *speaker*.
3) Listen for the dial tone.
4) Dial the number.
5) When the other party answers, talk into the microphone located at the bottom of the handset.

OR

1) Remove the handset from the charging cradle.
2) Dial the number.
3) Press *speaker*.
4) When the other party answers, talk into the microphone in the bottom of the handset.

From the base

1) Press ◀))/*flash*.
2) Listen for the dial tone.
3) Dial the number.

OR

1) Dial the number.
   If you need the phone to pause before dialing more digits (for example, to enter an access code or extension), press the center of the joystick, and select Pause Entry from the list. P appears in the display, which represents a 2-second pause.
2) Press ◀))/*flash*.

note
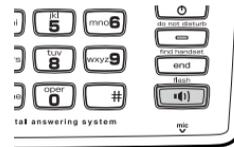

For best performance, use the speaker phone in a quiet room and let the caller finish speaking before you speak. If you or the other party has difficulty hearing, adjust the speaker volume.

Receiving a call

Handset is in the cradle	Handset is off the cradle
Remove the handset from the charging cradle and press *talk/flash*. If Auto Talk is ON, the phone will automatically answer the call when you pick up the handset. (see page 24)	Press *talk/flash*. If Any Key Answer is set to on, you can also press any key on the number pad to answer a call. (see page 25)

From the base
Press ◀))/*flash*.

Hanging Up
From the handset, press *end* or return the handset to the charging cradle.
From the base, press *end/find handset*.

Switching to the Handset Speakerphone During a Call
To switch a normal call to the speakerphone, press *speaker*. To switch from a speakerphone call to a normal call, press *speaker*.

Moving out of range

If you move your handset farther from the base unit during a call, you might start to hear more noise than usual. If you go too far from the base, you will hear a beep and see No Signal Press HELP. Press the **HELP** soft key on the display.

Call Waiting

If you hear a call waiting tone while you are on a call, press *talk/flash* or ◄))/*flash* on the base to switch to the new call. After a short pause, you will hear the new caller. Press *talk/flash* or ◄))/*flash* on the base again to go back to the original caller.

Call Waiting Deluxe

If you subscribe to Call Waiting Deluxe (CWDX) from your phone company, you have several different options when you get a call waiting call. When you hear the call waiting tone, instead of answering the call, you can press the center of the joystick or *menu/select* on the base, or the **OPTION** soft key, and then select CallWaitDeluxe. Use joystick or the up/down key or press 1-7 to choose from the following options:

<Call options>
1 Mute
2 CallWaitDeluxe
3 Call Record
4 Audio Tone
5 Call Privacy

SELECT

Option	Definition	Press

Tell Busy	A prerecorded message tells the caller you are busy, and the waiting call is disconnected.	2
Forward	The caller is sent to your voice mail box, if available.	3
Answer/Drop 1	Disconnects the first call, and connects to the new caller.	4
Conference	Starts a conference call with your first and second callers.	5
Drop First/Drop Last	During a conference call, allows you to choose to drop the first or last caller.	6 / 7

Placing a Call on Hold

During a call, press *back/hold/int'com*, to put the call on hold. Press *talk/flash* or ◄»)*/flash* on the base to go back to the call.
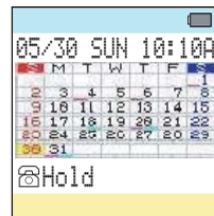

Conferencing

If you have more than one handset, up to four people can participate in a conference call.

3-Way Conferencing
• Outside line + Handset + Base (or Handset)

4-Way Conferencing
• Outside line + Handset + Handset + Base

Joining a Conference Call

You can easily join a call already in progress.

From the base

1) Press 🔊 on the base to join the conference call.
2) To hang up, press *end/find handset*. The handset(s) will still be connected to the call.

note
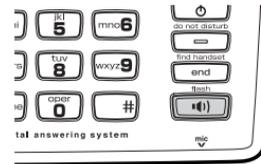

• If you leave a call on hold for a more than 5 minutes, a warning tone sounds and Hold Reminder! Answer held line appears, and the line will disconnect in 15 seconds.

• If someone is using another handset or base in Privacy Mode, Unavailable appears in the display, and you cannot join the call.

From the handset
1) Press *talk/flash* or *speaker* on the handset to join the call.
2) To hangup, return the handset to the cradle or press *end* on the handset. The base or other handset will still be connected to the call.
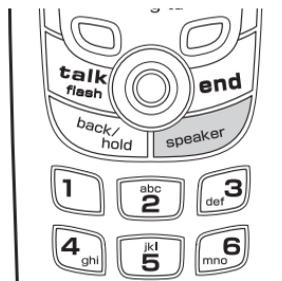

Invite someone to a conference
Press *back/hold/intercom* or *hold/intercom/back* on the base. Select the handset or the base to ask joining the conference.

On the receiving party, press *talk/flash* or *speaker*, or ◄)) on the base to answer the page. Press *talk/flash* or *speaker*, or ◄)) on the base to join the conference. The initiate handset or base returns to standby mode. press *talk/flash* or *speaker*, or ◄)) on the base to join the conference.

Redialing Calls

You can quickly redial the last 20 phone numbers dialed from each handset and 10 numbers from the base.

With the phone in standby mode, slide the joystick down (or press *menu/select*, and then select Redial on the base). This brings up the redial list. Use the joystick or up/down key to scroll through the numbers, and select the number you want to dial.
Press *talk/flash* (or *speaker*,) or ◄))*/flash* on the base to dial the selected number.
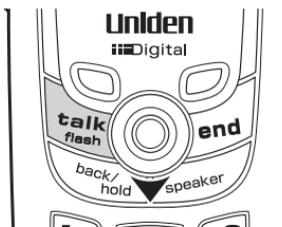

You can also display the redial list with the phone in talk mode. After selecting the number, press the **DIAL** soft key to dial the number.

Deleting Redial Records
If you want to delete a phone number from the redial list, go to the redial list in standby mode, and select the number you want to delete. Press the **OPTIONS** soft key, and select Delete Selection, and then Yes. Press the center of the joystick or *menu/select* on the base. If you want to delete all the redial records, select Delete All, and then Yes. Press the center of the joystick or *menu/select* on the base.

Adjusting Base Ringer and Speaker Volumes

Adjusting the base ringer volume
You can choose from three ringer settings on the base: off, low, and high. When the phone is in standby mode, go to Rings/Volumes menu, and then select Ringer Volume. Use the up/down key to select the ringer volume, and then press *menu/select*. You will here a confirmation tone.
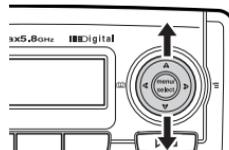

Adjusting the base speaker volume
You can adjust the volume of the speaker during a call. Press the up/down during a call to choose one of the 10 volume levels.

You can also set the speaker volume from the menu. Go to Rings/Volumes menu, and then select Speaker Volume. Use the up/down key to select the speaker volume, and then press *menu/select*. You will hear a confirmation tone.

Rings/Volumes
Ringer Volume
Speaker Volume

Using the Handset Volume Options

Ringer: Adjust the handset ringer volume You can choose from three different ringer volume settings on your handset: off, low, and high. When the phone is in standby mode, go to the Ringer Options menu, and then select Ringer Volume. Use the joystick to select the ringer volume, and press the center of the joystick. You will hear a confirmation tone.

Earpiece speaker:
You can choose from six volume levels for the earpiece speaker. To adjust the volume, go to Speaker Setup menu, and select Earpiece Volume and select the volume level you want to use.
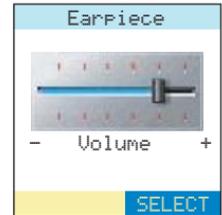

You can also adjust the earpiece volume during a call by pressing the △ or ▽ keys on the side of the handset to make it louder or softer.

Speaker: Adjust the handset speaker volume

You can choose from six volume levels for the handset speakerphone. To adjust the speaker volume, go to Speaker Setup menu, and select Speaker Volume, and then select the volume level you want to use.

You can also adjust the handset speaker volume during a call by pressing the ▽ or △ key on the side of the handset to make it louder or softer.

Audio Tone

If you aren't satisfied with the audio quality of your phone, you can adjust the Audio Tone of the earpiece. Your phone gives you three audio tone options: low, natural or high. Go to Speaker Setup menu, and select Audio Tone and select the option that sounds best to you.

(Audio tone adjustments only apply to the earpiece, not the speakerphone.)

Mute

While the handset is ringing, you can mute the handset ringer for this call by pressing *end* on the handset. To mute the base ringer, press ▷▫ or *end/find handset* on the base. The phone will ring as normal on the next call.

Mute the Microphone

When you're on the phone, press the center of the joystick or *menu/select* on the base and select Mute to turn off the microphone so the caller will not hear you. The display shows Mute On while the microphone is muted. To turn off muting, repeat the above step again.
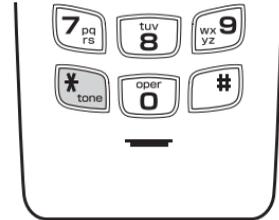

Tone Dialing Switch Over

If your telephone company uses pulse dialing, you can switch over to tone dialing after the call connects. This feature is useful when you need tone dialing to use any automated menu systems, such as automated banking, prescription refill lines, customer support menus, etc.

If your phone is set to pulse dialing mode, make your call normally. Once your call connects, press *∗/tone* on the handset or base. Any digits you enter from then on will be sent as tone digits. When this particular call ends, the phone automatically returns to pulse dialing mode.

Privacy Mode

Privacy mode prevents interruption from other registered handsets or the base. This works only when the phone is in use. While on a call, press the **OPTIONS** soft key on the handset or base. Use the joystick or the up/down key to select Call Privacy. Privacy Mode On appears in the display. To exit Privacy Mode, use the same procedure. Privacy Mode Off appears.

Find Handset

To locate the handset, press *end/find handset*. on the base when the phone is in standby mode. Select the handset to page. The handset beeps for 60 seconds, and Paging appears on the handset display. To cancel paging, press any key on the handset or *end/find handset* on the base.
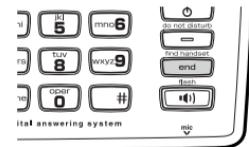

Reminder (Handset only)

The Date & Time must be set to use the Calendar features. To set the Date & Time, scroll to Global System Setup options. (see page 26.)

Your phone has a built-in calendar that you can use to schedule reminders and appointments (all the way through December 31, 2099). You can set alarms for up to 30 different events.
A pop-up screen appears and a reminder tone sounds when the scheduled time & date arrives. To show detailed info on the reminder, press the **VIEW** soft key. To mute the reminder tone, press the **MUTE** key.

To reset the reminder and clear the screen, press *end* when the reminder tone stops. To dismiss Reminder display press DISMISS appears. Press the **DIMISS** soft key. The phone returns to standby mode.

Scheduling a reminder

Select the reminder option to show Reminder (Calendar). Today is highlighted. If the reminder is set for the morning, a bar appears in the lower left of the date number; if the reminder is set for the afternoon or evening, a bar appears in the lower right of the date number. Use up, down, right or left key to move the cursor to the desired date.

1) Press the center of the joystick to select a date.
2) Press the **STORE** soft key to add a reminder.
3) Press the center of the Joystick to set the date and time.
4) Use the number keypad or *⁄*tone* to select the hours and minutes. Press the center of the joystick when you finish.

5) To change the title, select ! and press the center of the joystick. Use the number keypad, left, right key, and the **DELETE** soft key. Press the center of the joystick when you finish.

6) If you want to set recurrence, select ↻, and press the center of the joystick. Select the frequency (None, Daily, Weekly, Monthly, Yearly) from the list. Press the center of the joystick when you finish.
7) If you want your phone to ring when this reminder occurs, move to the line

   indicated by ♪, and press the center of the joystick. Select the ringer tone you want the phone to use. Press the center of the joystick when you finish.

8) To enter a reminder text for this reminder, select ▤ and press the center of the joystick. Edit Message appears. You can enter up to 80 characters. Press the center of the joystick when you finish.

9) When everything is correct, press the **DONE** soft key.

Editing and deleting reminders
You can edit reminders by pressing the **SCHEDULE** soft key and selecting the reminder by pressing the **OPTIONS** key. Once the reminder is selected, you can edit the date, time, reminder tone, and text the same way you entered them for a new entry.
To delete reminders, select the reminder and press the **OPTIONS** soft key. Select Delete Selection. To delete all reminders, select Delete All.

Using the Phonebook

Your phone lets you store up to 100 entries in each handset and base. You can store up to 4 phone numbers for each name in your phonebook (for a total of 400 numbers), and you can assign names to groups for easy searching. You can store a distinctive ringer tone and picture display, to each name or group.

You can enter your phonebook by sliding the joystick to the left (or by pressing the phonebook key on the base).
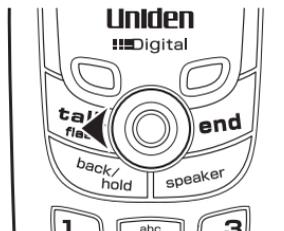

Creating and Editing Phonebook Entries

Enter the phonebook menu and press the **STORE** soft key for the first entry. From the 2nd entry, enter the phonebook menu and then the **OPTIONS** soft key. Select New Entry to store, or Edit Selection to edit the location. Enter as much of the information as you want. Press the center of the joystick or *menu/select* to enter each entry and confirm the selection. When you finish, press the **DONE** soft key to save this phonebook entry.

note

You can save up to 4 numbers for each phonebook entry. You'll have to delete one of the existing numbers before you add a new one.

Step 1: Name ⚋/◼

Select ⚋, (or ◼ on the base) and use the keypad to enter the name for this entry. You can enter up to 16 characters. If you don't want to enter a name, your phone will store this entry as No Name. Press the center of the joystick or *menu/select* when you finish, and your phone will go back to the current phonebook entry.

display. You can stack more than one pause together if two seconds is not long enough. Each pause counts as one digit; you can enter up to 20 digits for the phone number. Press the center of the joystick or *menu/select* when you finish, and your phone will go back to the current phonebook entry.

You can select an icon to remind you which number this is: home ⌂, 🏠, work 🏢,

🏢, mobile ▯, ▮, or general phone number. ☏, ☎ Press the center of the joystick or *menu/select* when you finish.

Step 3: Unique Ring ♫/♪

Select ♫, (or ♪ on the base) to attach a special ring to this entry. Select the ringer tone you want the phone to use when this person calls, or select No Selection to have the phone use its regular ringer tone. Press the center of the joystick or *menu/select* on the base when you finish, and your phone will go back to the current phonebook entry.

Step 4: Unique Display (Handset only) ✎

Select ✎ to attach a special screen display to this entry. Select the display you want the phone to use when this person calls, or select No Selection to have the phone use its regular display. You can press the **VIEW** soft key to see the display choices.

Press the center of the joystick when you finish, and your phone will go back to the current phonebook entry.

Step 5: Phonebook Group 🏠/👥

Select 🏠, (or 👥 on the base) to place this entry into a phonebook group. Select the group (0-9) you want this entry to belong to, or select No Selection to leave the entry outside of any group. Press the center of the joystick or *menu/select* when you finish, and your phone will go back to the current phonebook entry. See page 55 for information on creating and editing groups.

Step 6: Speed Dial 📖/🔔

Select *0-9* to save this number to one of the 10 speed dial numbers or No Selection if you don't want to save it to a speed dial number. If a phone number already exists for the speed dial number you select, your phone will ask if you want to overwrite the number. Press the center of the joystick or *menu/select* when you finish, and your phone will go back to the current phonebook entry.

Storing Caller ID or Redial Numbers in the Phonebook

You can store Caller ID or redial numbers in your phonebook so you can use them later. Go to the Caller ID list or redial list and select the number you want to store. (If the Caller ID information did not include the number, then you will not be able to store it.)

1) With the phone in standby mode, go to the Caller ID list or redial list and select the number you want to store.
2) Press **OPTIONS** soft key, and then select Add to Phonebook.
3) Use the joystick or the up/down key to select New Entry to enter a new phonebook location. If you want to add a number to the existing phonebook location, select Store & Edit, and then select a location to edit.
4) Enter each entry and confirm the selection by following the steps in pages 50-51.

Storing and Editing Numbers from the Dial Operation
1) With the phone in standby mode, enter the number to store using the number keypad.
2) Press the center of the joystick or *menu/select* and select Add to Phonebook.
3) Use the joystick or the up/down key to select New Entry to enter a new phonebook location. If you want to add a number to the existing phonebook location, select Store & Edit, and then select a location to edit.
4) Enter each entry and confirm the selection by following the steps in pages 50-51.

Managing the Phonebook

With the **OPTIONS** soft key, you can delete phonebook entries, copy entries to another handset or base, check how many empty phonebook and speed dial entries you have available, sort your phonebook by groups, and name phonebook groups.

Deleting phonebook entries

Go to the phonebook and select the entry you want to delete. Press the **OPTIONS** soft key and select Delete Selection. Your phone will ask you to confirm, select Yes.

To delete all the entries from your phonebook, go to the phonebook and press the **OPTIONS** soft key without selecting an entry. Select Delete All. Your phone will ask you to confirm, select Yes.

Copying phonebook entries to another handset

Note: When you copy entries to another handset or base, the group and speed dial information won't be transferred. Your phone will cancel the copying process if any one of the following occurs:

  -- If the handset you are copying to does not have enough memory (the phone will show "Not enough memory in receiving unit").
  -- A call comes in during the copying process.

To copy a single entry, go to the Phonebook and select the entry you want to copy. Press the **OPTIONS** soft key and then select Copy Selection. Select the handset or base you want to copy the entry to. Your phone will ask you to confirm, select Yes.
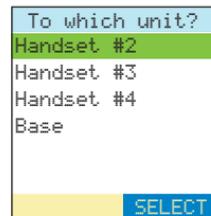

To copy all the phonebook entries, go to the phonebook and press the **OPTIONS** soft key without selecting an entry. Select Copy All. Select the handset or base you want to copy the entry to.

When you delete a Caller ID number, you delete it permanently from the caller id list.

Answering Machine

The phone has a built-in answering machine that answers and records incoming calls. You can also use your answering machine to record a conversation, leave a voice memo message, or announce a special outgoing message to callers when you are away from your phone.

Features
- Digital Tapeless Recording
- Up to 12 minutes of Recording Time
- Call Screening
- Personal or Prerecorded Outgoing Messages
- Voice Prompts (English, Spanish, or French)
- Time and Day Announcement
- Remote Message Retrieval
- Toll Saver
- Conversation Recording
- Voice Memo
- Message Alert On/Off
- Retrieve Messages Using Handset
- Do Not Disturb
- Hands-free Speakerphone

Setting Up the Answering Machine

To access the answering machine settings, go to the System Setup Menu and select Answer Machine.
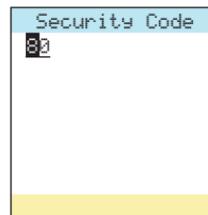

Security Code

If you want to call in and get your messages when you are away from home, you will have to set a security code. Go to Answer Machine and select Security Code. Use the keypad to enter a two-digit number (01-99), and press the center of the joystick or *menu/select* on the base when you finish. A confirmation tone tells you the security code has been saved.

(System Setup)

- Answer Machine
  - Ring Time
  - Record Time

Ring Time

You can set the number of times the phone will ring before the machine answers the call. Go to Answer Machine and select Ring Time. Then select the number of times you want the phone to ring; choose from 2, 4, or 6 times. The Toll Saver feature makes the answering machine answer after two rings if you have new messages and after four rings if you don't. With the Toll Saver feature, the answering machine answers after two rings when you have new messages and four rings when you have none. If

Turning On the Answering Machine
You can turn on/off the machine using the handset remote function. Slide the

Joystick up. Press 🔄/9. Each time the key is pressed the answering machine switches between On and Off.

From the base, with the phone in standby mode, press *answer on/off*. MESSAGE appears on the display. If the number is flashing, then there are new messages waiting for you. To turn your answering machine off, press *answer on/off* again.

Reviewing Messages

When you have a new message, the new message LED on the handset blinks. The LED stops blinking when you listen to all of your new messages. The answering machine plays your new messages first. After you play all of your new messages, you can then play your old messages.

You can review your messages from the base or from the handset:

	From the base	From the handset
Playing your messages	Press ▷/□ . The answering machine tells you how many new and old messages you have. It announces the message number, plays the message, then announces the time and date that message was received.	Slide the joystick up. The phone tells you how many new and old messages you have. Press ▶/*2* to play your messages. After playing the message, the answering machine announces the time and date that message was received.
Repeating a message	Press ◁ once to go to the beginning of the current message. Press ◁ repeatedly to go back to a previous message. Press and hold ◁ to rewind through the current message.	Press ◀◀/*1* once to go to the beginning of the current message. Press ◀◀/*1* repeatedly to go back to a previous message.
Skipping a message	Press ▷ to go to the beginning of the next message. Press and hold ▷ to fast forward through the current message.	Press ▶▶/*3* to go to the beginning of the next message. Press and hold ▶▶/*3* to fast forward through the current message.
Delete a message	While a message is playing, press Ø to delete it. The message is permanently deleted.	While a message is playing, press Ø/*4* to delete it. The message is permanently deleted.
Delete all messages	While the phone is in standby, press Ø to delete all messages. When the answering machine asks you to confirm, press delete again. All messages are permanently deleted.	-
Stop reviewing messages	Press ▷/□ to stop the message playback and return to standby.	Press ■/*5* to stop the message playback. Press *end* to exit the message system and return to standby.

note

• You can not delete unheard messages. If you try to delete messages before listening to them, the answering machine will beep and say "Please playback all messages."

• If you press ◁ during the first two seconds (or press ◀◀/*1* during the first 4 seconds) of a message, the answering machine goes back to the previous message.

Recording a phone conversation

You can record a phone conversation with your handset or base. The conversation has to last more than two seconds and less than ten minutes. During a conversation, press the center of the joystick or *menu/select*. Use the joystick or the up/down key to select Call Record. The handset or the base sounds a confirmation tone that can be heard by both parties and displays Recording a call. When you want to stop recording, press the center of the joystick or *menu/select* and select Call Record again.

Screening Calls

You can screen calls from the base: by allowing the answering machine to answer the call and listening as the caller leaves a message. Answer the phone if you want to talk to the caller. To mute the call screen, press ▷▫.

If you turn on the call screen feature (see page 61), you can also screen calls from the handset. Let the answering machine answer the call, then press the volume up key. If you want to talk to the caller, just press *talk/flash* or ◄◉)*/flash* on the base, and the answering machine will stop recording. To mute the call screen, press *end*.

Do Not Disturb (DND)

The do not disturb feature (DND) allows you to mute the ringer of the base and any registered handsets at the same time. The phone must be in standby mode. Press and hold *dnd* on the base. You will hear a confirmation tone, and the dnd LED illuminates. To cancel the DND feature, press *dnd* again. You can also mute the ringer tone while the phone is ringing by pressing *dnd* on the base.

Activating the DND while the answering system is off will turn the answering system on automatically. The answering system setting will reset to the original setting when you cancel the DND.

Recording a voice memo

The voice memo function allows you to record messages (more than 2 seconds and less than 4 minutes). To record your memo, make sure the phone is in standby mode. Press *menu/select* on the base. Select Record Memo and press *menu/select*. Press the **START** soft key. After the answering machine says, "Record memo message," you can start recording. When you finish, press the **STOP** soft key. You will hear a confirmation tone.

You can also record a voice memo remotely, Press ⊠ and then ⬚/7. After the answering machine says, "Record Memo Message" you can start recording. When you finish, press ⬚/7 key.

Remote Operation

You can check, play, or delete messages when you are away from home. You can also record your own personal greeting. To access your answering machine remotely, you need a touch tone telephone and a two-digit security code (see Setting a Security Code on page 59).

1) Call your telephone number and wait for the system to answer. If Toll Saver is enabled, the answering machine will answer in 2 rings if you have new messages or 4 rings if you have none. If the answering machine is off, it will answer after about 10 rings and sound a series of beeps.
2) During the greeting message (or a series of beeps when the answering machine is off), press **0** and enter your security code within two seconds.
3) The answering machine announces the current time and the number of messages stored in memory. You hear "To play incoming messages, press zero-two. For help, press one-zero." Then, you hear a beep.
4) Enter a command from the following chart within 15 seconds. After the first command, you have two seconds to enter each command.

Command	Function	Command	Function
0 then *1*	Repeat a Message*	*0* then *6*	Answering machine On
0 then *2*	Play incoming Messages	*0* then *7*	Memo Record/Stop**
0 then *3*	Skip a Message	*0* then *8*	Greeting Message Record/Stop**
0 then *4*	Delete a Message	*0* then *9*	Answering machine Off
0 then *5*	Stop Operation	*1* then *0*	Help

* For the Repeat a Message function, press *0* then *1* within about 4 seconds to repeat the previous message, or press *0* then *1* after about 4 seconds to repeat the current message.

** The first time you enter the Memo Record or the Greeting Message Record command, the answering machine will start recording. Enter the same command again to stop recording.

5) When you finish, you will hear intermittent beeps indicating that the system is in the command waiting mode. You can enter another command from the chart, or you can hang up to exit the system.

6) When you hang up, the answering machine automatically returns to its normal setting.

The features in this section require a minimum of two handsets to operate. To add additional handsets to your system, see "Expanding Your Phone" on page 11.

Using DirectLink Mode

In DirectLink Mode, a pair of handsets can function as two-way radios. DirectLink Mode does not interfere with the base's ability to make or receive telephone calls. You must set both handsets to DirectLink Mode to make a DirectLink call.

To enter DirectLink mode, select Direct Link option from the main menu. And then press the **ENTER** soft key. Direct Link Mode complete. appears once the selection is confirmed.

To make a DirectLink call, press the **DirectLink** soft key. Select the handset you want to call. To answer a DirectLink call, press *talk/flash* or if Any Key Answer is on, press any number key, *✳/tone* or *#* key. Press *end* when you want to hang up.

To exit DirectLink mode and be able to receive normal phone calls again, press the **CANCEL** soft key, and then press the **OK** soft key.
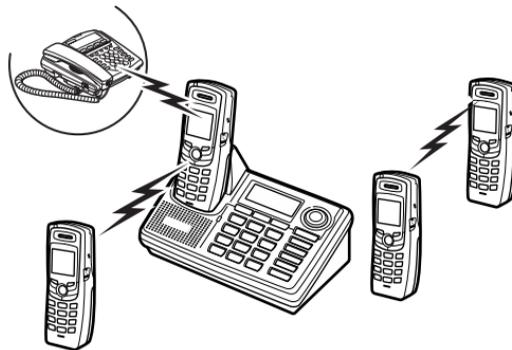

Room/Baby Monitor

This feature allows you to monitor sounds in another room. Place a handset or the base in the room you wish to monitor; it will function as a microphone. A second handset or the base can be used as a remote speaker, allowing you to monitor sounds in the room.
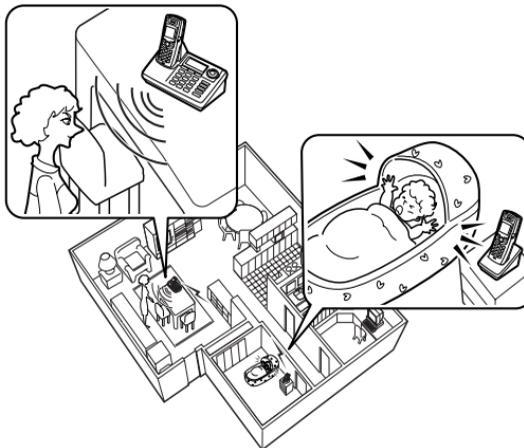

Using Room/Baby Monitor

To enter Room Monitor mode, press the center of the joystick or *menu/ select*. Select the Room Monitor option and then select the handset or base you want to monitor. Press *end* from the handset or *end/find handset* from the base when you want to stop monitoring.

To prevent the monitoring of a particular handset or the base, simply turn off the Room Monitor feature on that handset or on the base.

To turn off the Room Monitor, go to System Setup, select Base from the base menu or select Handset from the handset menu; then Room Monitor and select off. You will hear a confirmation tone.

note

- This feature only works when the handset is within the range of the base.

- If the party is out of range, Unavailable appears in the display, and the operation will be canceled.

Intercom

You can use the intercom to talk to another handset or base without using the phone line. While the phone is in standby mode, press *back/hold/int'com*. Select the handset or base you want to page. If you select All, all other handsets and the base will be paged.

```
       Intercom
All
Handset     #2
Handset     #3
Handset     #4
Base

                SELECT
```

If the handset or base you are trying to page is busy, the phone displays System busy Please try later. If the handset you are trying to page is out of range, the phone displays No Signal Press HELP and the page is canceled.

Answering an intercom page

When the handset receives an intercom page, it sounds a tone and shows the ID of the handset that is paging. To answer the page, pick up the handset and press *talk/flash, speaker*, or *back/hold/int'com* on the handset, ◀))*/flash* or *back/hold/int'com* on the base.

• If you receive an outside/intercom call or page while selecting the other handset, the operation is canceled.
• If the party does not answer within one minute, the operation is canceled.
• During an intercom call, if you receive a call, you will hear a ringer tone from the ear speaker.
• If all handsets are paged, only the first party to answer the page will connect.
• If you do not select a handset within 30 seconds, the operation will be canceled.

To hang up an intercom page, press *end* on any handset or *end/find handset* on the base.

Transferring a Call

You can transfer calls between the handsets and the base or between any two handsets. During a call, press *back/hold/int'com*; this will put the call on hold. Select the handset or base you want to transfer the call to cancel the transfer and go back to the caller, press *talk /flash* or ◀)) */flash* on the base.

Answering a transfer page

When the handset receives a transfer page, it sounds a tone and shows the ID of the handset. Press *talk/flash*, *speaker* or *back/hold/int'com* on the handset or ◀)) */flash* or *back/hold/int'com* on the base to answer the page. If you want to accept the transfer and talk to the outside caller, press *talk/flash* or *back/hold/int'com* on the handset, or ◀)) */flash* or *back/hold/int'com* on the base.

Note on Power Sources

Note on Power Sources

Power Failure

During the period that the power is off, you will not be able to make or receive calls with the telephone.

Optional Power Backup Feature

The phone has an optional backup battery in the base. It provides power backup in the event of a power failure or outage. You will be able to make or receive calls with the telephone.

Battery replacement and handling

When the operating time becomes short, even after the battery is recharged, please replace the battery. With normal usage, your battery should last about one year.

Warning

To avoid the risk of personal injury or property damage from fire or electrical shock, use only Uniden AD-0006 AC adapters and Uniden BT-0003 battery packs with your phone.

Install the optional power backup battery in the base

The battery backup allows you to make and receive calls during a power failure. You can use any handset or the base, just as you would normally.
1) Open the battery case cover by pressing in slightly on the right side of the base as shown.
2) Place the battery pack in the battery compartment with the connectors on the battery and on the compartment aligned.
3) Push the battery compartment back in.

note

- ▯▧ appears in LCD as a warning that the backup battery pack is NOT installed in the base unit.
- To use the backup battery Feature you need to connect the AC adapter to the base, and charge the base battery for at least 24 hours.
- Use only the Uniden (BT-0003) rechargeable battery pack. The battery may be purchased by calling Uniden's Parts Department (see back cover page).

Caution
- Use only the specified Uniden battery pack (BT-0003).
- Do not remove the batteries from the handset to charge them.
- Never throw the battery into a fire, disassemble them, or heat them.
- Do not remove or damage the battery casing.

General Information

The phone complies with FCC Parts 15 and 68. Operating temperature:
0 °C to +50 °C (+32 °F to +122 °F)

AC Adapter Information

AC Adapter part number: AD-0006
Input Voltage: 120V AC 60Hz
Output Voltage: 9V DC 500mA

Battery Information

Battery part number: BT-0003
Capacity: 900mAh, 3.6V

Specifications, features, and availability of optional accessories are all subject to change without prior notice.

Troubleshooting

If your phone is not performing to your expectations, please try these simple steps first. If these steps do not solve your problem, please call our Customer Service Hotline at 1-800-297-1023. (Mon - Fri 7 am to 7 pm, Sat/Sun 9 am to 5 pm, CST. The Customer Service Hotline is closed on holidays.)

Symptom	Suggestion
The **charge** LED won't illuminate when the handset is placed in the cradle.	• Make sure the AC adapter is plugged into the base or the chargers (if you have more than one handset) and the wall outlet. • Make sure the handset is properly seated in the cradle. • Make sure the charging contacts on the handset are clean.
The charge LED flashes.	• Clean the charging contacts on the handset.
The audio sounds weak.	• Move the handset and/or base away from metal objects or appliances and try again. • Make sure that you are not too far away from the base.
Unable to make or receive calls.	• Make sure that you are not too far away from the base. • Make sure the line is not in use. If an outside call is already in use on a line, you cannot use that line to make another outside call. • Check both ends of the base telephone line cord. • Make sure the AC adapter is plugged into the base and wall outlet. • Disconnect the AC adapter and the backup battery. • Change the Digital Security Code (see page 14).
The handset does not ring or receive a page.	• Make sure that you are not too far away from the base. • Charge the battery pack in the handset for 15 hours by placing the handset on the base or charging cradle. • Change the Digital Security Code (see page 14).
Severe noise interference.	• Keep the handset away from microwave ovens, computers, remote control toys, wireless microphones, alarm systems, intercoms, room monitors, fluorescent lights, and electrical appliances. • Move to another location or turn off the source of interference.

Symptom	Suggestion
The Caller ID does not display.	• The call was placed through a switchboard. • Call your local telephone company to verify your Caller ID service is working properly or if there has been a temporary service interruption.
You cannot register the handset at the base.	• Charge the battery pack in the handset for 10 hours. • Change the Digital Security Code (see page 14).
The handset does not communicate with other handsets.	• Change the Digital Security Code (see page 14). • Make sure that you have registered all handsets.
An extra handset is not able to join the conversation.	• Make sure there are not 2 handsets already using the conference feature. • Make sure that another handset is not in privacy mode.
The Room Monitor feature does not work.	• Make sure to place the handset(s) within the range of the base.
The answering machine does not work.	• Make sure the base unit is plugged in. • Make sure that the answering machine is turned on. • Make sure that the message record time is not set to Announce only (see page 60).
Messages are incomplete.	• The incoming messages may be too long. Remind callers to leave a brief message. • The memory may be full. Delete some or all of the saved messages.
No sound on the base unit or handset speaker during call monitoring or message playback.	• Adjust the speaker volume on the base unit or handset. • Make sure the call screen feature is set to on.

Troubleshooting

Symptom	Suggestion
Cannot access remote call-in features from another touch-tone phone.	• Make sure you are using the correct PIN number. • Make sure that the touch-tone phone you're using can transmit the tone for at least two seconds. If it cannot, you may have to use another phone.
Time stamp cannot be heard.	• Make sure you have set the time (see "Setting Date and Time" on page 26).

System Reset
De-register the Handset

1) Press and hold *end* and *#* for more than 5 seconds. Select `Deregister HS`.
2) The phone will ask you to confirm the deregistration. Select `Yes`.

When the base information is deleted, the handset displays
`MUST place the handset in base to register! Models may vary, refer to Owners Manual for help` Re-register the handset to the base (see page 13).

Replacing the Base Setting

1) Press and hold *end* and *#* for more than 5 seconds. Select `Replacing Base`.
2) Select `Yes`.
3) You will hear a confirmation tone. The base information will be deleted.

When the base information is deleted, the handset displays
`MUST place the handset in base to register! Models may vary, refer to Owners Manual for help` Re-register the handset to the base (see page 13).

Troubleshooting
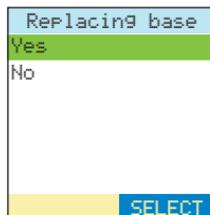

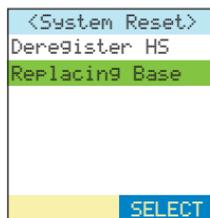

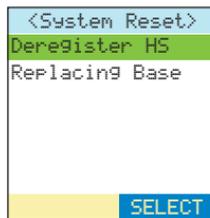

Liquid Damage

Moisture and liquid may damage your cordless phone. Follow the steps below if your phone gets wet:

Case	Action
If the exterior plastic housing on the handset or base is exposed to moisture or liquid.	Wipe off the liquid, and use as normal.
If moisture or liquid has entered the plastic housing (i.e. liquid can be heard in the phone or liquid has entered the handset battery compartment or vent openings on the base).	**Handset:** 1) Remove the battery cover and leave it off for ventilation. 2) Disconnect the battery pack. Leave the battery cover off and the battery pack disconnected for at least 3 days. 3) Once the handset is completely dry, reconnect the battery pack and the battery cover. 4) Recharge the handset's battery pack for 20 hours before using. **Base:** 1) Disconnect the AC adapter from the base, cutting off electrical power. 2) Disconnect the telephone cord from the base. 3) Let dry for at least 3 days. **IMPORTANT:** You must **unplug the telephone line while recharging the battery packs** to avoid charge interruption. **CAUTION:** DO NOT use a microwave oven to speed up the drying process. This will cause permanent damage to the handset, base and the microwave oven. After following these steps, if your cordless telephone does not work, please call our Customer Service Hotline at 1-800-297-1023.

Precautions!

Before you read anything else, please observe the following:

Warning!
Uniden America Corporation DOES NOT represent this unit to be waterproof. To reduce the risk of fire, electrical shock, or damage to the unit, DO NOT expose this unit to rain or moisture.

Rechargeable Nickel-Metal-Hydride Battery Warning

• This equipment contains rechargeable Nickel-Metal-Hydride batteries.
• The rechargeable batteries contained in this equipment may explode if disposed of in a fire.
• Nickel is a chemical known to state of California to cause cancer.
• Do not short-circuit the battery.
• Do not charge the rechargeable batteries used in this equipment in any charger other than the one designed to charge these batteries as specified in the owner's manual. Using another charger may damage the battery or cause the battery to explode.

Rechargeable Batteries Must Be Recycled or Disposed of Properly

⚠	The exclamation point within an equilateral **⚠** is intended to alert the user to the presence of important operating and maintenance (servicing) instructions in the literature accompanying the appliance.

Uniden works to reduce lead content in our PVC coated cords in our products and accessories.

Warning!
The cords on this product and/or accessories contain lead, a chemical known to the State of California to cause birth defects or other reproductive harm. ***Wash hands after handling***.

Important Safety Instructions

When using your telephone equipment, basic safety precautions should always be followed to reduce the risk of fire, electric shock and injury to persons, including the following:

1. Do not use this product near water, for example, near a bath tub, wash bowl, kitchen sink or laundry tub, in a wet basement or near a swimming pool.
2. Avoid using a telephone (other than a cordless type) during an electrical storm. There may be a remote risk of electric shock from lightning.

3. Do not use the telephone to report a gas leak in the vicinity of the leak.
4. Use only the power cord and batteries indicated in this manual. Do not dispose of batteries in a fire. They may explode. Check with local codes for possible battery disposal instructions.
5. Do not disassemble any component of this product.

SAVE THESE INSTRUCTIONS

CAUTION
Risk of explosion if battery is replaced by an incorrect type. Dispose of used batteries according to the instructions. Do not open or mutilate the battery, and disconnect the battery before shipping this product.

The FCC Wants You To Know

This equipment complies with Part 68 of the FCC rules and the requirements adopted by the ACTA. On the bottom of this equipment is a label that contains, among other information, a product identifier in the format US:AAAEQ##TXXXX. If requested, this number must be provided to the telephone company.

An applicable Universal Service Order Codes (USOC) certification for the jacks used in this equipment is provided (i.e., RJ11C) in the packaging with each piece of approved terminal equipment.
A plug and jack used to connect this equipment to the premises wiring and telephone network must comply with the applicable FCC Part 68 rules and requirements adopted by the ACTA. A compliant telephone cord and modular plug is provided with this product. It is designed to be connected to a compatible modular jack that is also compliant. See installation instructions for details.

The REN is used to determine the number of devices that may be connected to a telephone line. Excessive RENs on a telephone line may result in the devices not ringing in response to an incoming call. In most but not all areas, the sum of RENs should not exceed five (5.0). To be certain of the number of devices that may be connected to a line, as determined by the total RENs, contact the local telephone company. For products approved after July 23, 2001, the REN for this product is part of the product identifier that has the format US:AAAEQ##TXXXX. The digits represented by ## are the REN without a decimal point (e.g., 03 is a REN of 0.3). For earlier products, the REN is separately shown on the label.

If this equipment causes harm to the telephone network, the telephone company will notify you in advance that temporary discontinuance of service may be required. But if advance notice isn't practical, the telephone company will notify the customer as soon as possible. Also, you will be advised of your right to file a complaint with the FCC if you believe it is necessary.

The telephone company may make changes in its facilities, equipment, operations or procedures that could affect the operation of the equipment. If this happens the telephone company will provide advance notice in order for you to make necessary modifications to maintain uninterrupted service.

Please follow instructions for repairing, if any (e.g. battery replacement section); otherwise do not substitute or repair any parts of the device except as specified in this manual.
Connection to party line service is subject to state tariffs. Contact the state public utility commission, public service commission or corporation commission for information.
This equipment is hearing aid compatible.

Should you experience trouble with this equipment, please contact Uniden customer service at 800-297-1023. If the equipment is causing harm to the telephone network, the telephone company may request that you disconnect the equipment until the problem is resolved.

NOTICE: According to telephone company reports, AC electrical surges, typically resulting from lightning strikes, are very destructive to telephone equipment connected to AC power sources. To minimize damage from these types of surges, a surge arrestor is recommended.

Changes or modifications to this product not expressly approved by Uniden, or operation of this product in any way other than as detailed by the owner's manual, could void your authority to operate this product.

This device complies with part 15 of the FCC rules. Operation is subject to the following two conditions: (1) This device may not cause harmful interference, and (2) This device must accept any interference received, including interference that may cause undesired operation. Privacy of communications, may not be ensured when using this phone. To insure the safety of users, the FCC has established criteria for the amount of radio frequency energy various products may produce depending on their intended usage. This product has been tested and found to comply with the FCC's exposure criteria. For body worn operation, the FCC RF exposure guidelines were also met when used with the Uniden accessories supplied or designed for this product. Use of other accessories may not ensure compliance with FCC RF exposure guidelines and should be avoided.

Radio Interference

Radio interference may occasionally cause buzzing and humming in your cordless handset, or clicking noises in the base. This interference is caused by external sources such as TV, refrigerator, vacuum cleaner, fluorescent lighting, or electrical storm. Your unit is NOT DEFECTIVE. If these noises continue and are too distracting, please check around your home to see what appliances may be causing the problem. In addition, we recommend that the base not be plugged into a circuit that also powers a major appliance because of the potential for interference. Be certain that the antenna on the unit is fully extended when needed.
In the unlikely event that you consistently hear other voices or distracting transmissions on your phone, you may be receiving radio signals from another cordless telephone or other source of interference. If you cannot eliminate this type of interference, you need to change to a different channel.

Finally, it should be noted that some cordless telephones operate at frequencies that may cause interference to nearby TVs and VCRs. To minimize or prevent such interference, the base of the cordless telephone should not be placed near or on top of a TV or VCR. If interference is experienced, moving the cordless telephone farther away from the TV or VCR will often reduce or eliminate the interference.

Cordless Telephone Privacy

Cordless telephones are radio devices. Communications between the handset and base of your cordless telephone are accomplished by means of radio waves which are broadcast over the open airways. Because of the inherent physical properties of radio waves, your communications can be received by radio receiving devices other than your own cordless telephone unit. Consequently, any communications using your cordless telephone may not be private.

One Year Limited Warranty

Important: Evidence of original purchase is required for warranty service.
WARRANTOR: UNIDEN AMERICA CORPORATION ("Uniden") ELEMENTS OF WARRANTY: Uniden warrants, for one year, to the original retail owner, this Uniden Product to be free from defects in materials and craftsmanship with only the limitations or exclusions set out below.

WARRANTY DURATION: This warranty to the original user shall terminate and be of no further effect 12 months after the date of original retail sale. The warranty is invalid if the Product is (A) damaged or not maintained as reasonable or necessary, (B) modified, altered, or used as part of any conversion kits, subassemblies, or any configurations not sold by Uniden, (C) improperly installed, (D) serviced or repaired by someone other than an authorized Uniden service center for a defect or malfunction covered by this warranty, (E) used in any conjunction with equipment or parts or as part of any system not manufactured by Uniden, or (F) installed or programmed by anyone other than as detailed by the owner's manual for this product. STATEMENT OF REMEDY: In the event that the product does not conform to this warranty at any time while this warranty is in effect, warrantor will either, at its option, repair or replace the defective unit and return it to you without charge for parts, service, or any other cost (except shipping and handling) incurred by warrantor or its representatives in connection with the performance of this warranty. Warrantor, at its option, may replace the unit with a new or refurbished unit. THE LIMITED WARRANTY SET FORTH ABOVE IS THE SOLE AND ENTIRE WARRANTY PERTAINING TO THE PRODUCT AND IS IN LIEU OF AND EXCLUDES ALL OTHER WARRANTIES OF ANY NATURE WHATSOEVER, WHETHER EXPRESS, IMPLIED OR ARISING BY OPERATION OF LAW, INCLUDING, BUT NOT LIMITED TO ANY IMPLIED WARRANTIES OF MERCHANTABILITY OR FITNESS FOR A PARTICULAR PURPOSE. THIS WARRANTY DOES NOT COVER OR PROVIDE FOR THE REIMBURSEMENT OR PAYMENT OF INCIDENTAL OR CONSEQUENTIAL DAMAGES. Some states do not allow this exclusion or limitation of incidental or consequential damages so the above limitation or exclusion may not apply to you.

LEGAL REMEDIES: This warranty gives you specific legal rights, and you may also have other rights which vary from state to state. This warranty is void outside the United States of America and Canada.
PROCEDURE FOR OBTAINING PERFORMANCE OF WARRANTY: If, after following the instructions in the owner's manual you are certain that the Product is defective, pack the Product carefully (preferably in its original packaging). Disconnect the battery from the Product and separately secure the battery in its own separate packaging within the shipping carton. The Product should include all parts and accessories originally packaged with the Product. Include evidence of original purchase and a note describing the defect that has caused you to return it. The Product should be shipped freight prepaid, by traceable means, to warrantor at:

Uniden America Service
4700 Amon Carter Blvd.
Fort Worth, TX 76155

I.C. Notice

TERMINAL EQUIPMENT

NOTICE: This equipment meets the applicable Industry Canada Terminal Equipment Technical Specifications. This is confirmed by the registration number. The abbreviation, IC, before the registration number signifies that registration was performed based on a Declaration of Conformity indicating that Industry Canada technical specifications were met. It does not imply that Industry Canada approved the equipment.

NOTICE: The Ringer Equivalence Number (REN) for this terminal equipment is marked on the equipment itself. The REN assigned to each terminal equipment provides an indication of the maximum number of terminals allowed to be connected to a telephone interface. The termination on an interface may consist of any combination of devices subject only to the requirement that the sum of the Ringer Equivalence Numbers of all the devices does not exceed five.

RADIO EQUIPMENT

The term "IC:" before the radio certification number only signifies that Industry Canada technical specifications were met.

Operation is subject to the following two conditions: (1) this device may not cause interference, and (2) this device must accept any interference, including interference that may cause undesired operation of the device. "Privacy of communications may not be ensured when using this telephone".
